ABSTRACT

This report is a photographic study of this ground force installation and provides the following data:

- A. Delineation of installation boundaries.
- B. Identification of functional areas.
- C. Measurements of selected buildings (barracks, storage buildings, vehicle sheds) within the installation.
- D. Equipment identification and location.

INTRODUCTION

The following alphabetical designators are used to identify functional areas within military installations:

- A. Billeting area
- B. Vehicle storage/maintenance area
- C. General storage area
- D. Ammunition storage area
- E. Miscellaneous areas (hospitals, prisons, POL, personnel training facilities)
- F. Small-arms firing area
- G. Driver training area
- H. Support area
- J. Tank/assault-gun firing area
- K. Automatic weapons firing area
- L. Tank miniature range
- M. APC firing area
- N. Combined arms training area
- P. Artillery training area
- Q. Infantry training area
- R. Special or unidentified area
- S. Engineer training area

The absence of one or more alphabetical designators indicates that those functional areas were not observed at that particular installation.

Lowercase letters (e.g., Ba) are used to identify more than one area of a particular functional category.

NOTE: This report is published as an Interim Basic Imagery Interpretation Report with concurrence of the Defense Intelligence Agency.
